

1-2-3-4 BUZZ

This old fashioned game is fun for the whole family, and great for counting and math practice.

Recommended for children age 9 and above, or old enough to understand counting and multiples.

To Play:

Stand in a circle or a line. The first person starts the counting. Each person says one number. Count by ones to 100. Every time you reach a multiple of 5 (5, 10, 15, 20 etc.) instead of saying the number say the word “buzz.” If you mess up you are out, and the counting re-starts with the next person in line.

- Once you get the hang of it other numbers can be substituted for sounds too. Try “Fizz” for multiples of 7. Add, or substitute other numbers for sounds too.
